

ELECTROMAGNETIC INDUSTRIES LLP

# Voltage Transformer Model 460-480-240

These transformers are encased in a thermoplastic case with the core and windings encapsulated in resin. They are designed for line to line operation but may also be used in line to neutral or line to ground configuration at 58% of rated voltage.

It is recommended that a 0.75 Amp fuse be used in the secondary to protect the transformer.

Frequency: 50 - 60Hz

Primary Voltage :480 VAC

Secondary Voltage :240 VAC

Insulation Level: 600 Volt, 10kV BIL Full Wave

Accuracy : 0.6% @ 7.5VA

Thermal Rating: 150 VA @ 30 C. amb,

Terminals are No. 10-32 brass studs with flat washer, lock washer and nut.

All units come with terminal covers.
